Year 10	Component 1A teaching: Human Lifespan development: Understand human growth and development across life stages and the factors that affect it	Component 1A assignment: Understanding how Life Affects our Growth and Development	Component 1B teaching: Human Lifespan development: Investigate how individuals deal with life events	Component 1B assignment: Coping with Life	Component 2A teaching: Health and Social care services and values: Understand the different types of Health and Social Care services and the barriers to accessing them	Component 2A assignment: Health and Social Care services and their barriers	Component 2B teaching: Health and Social care values: Demonstrate care values and review own practice	Component 3A teaching: Health and wellbeing				
Overview and links	This unit covers the different life stages that humans experience and the different areas of growth and development (Physical, Intellectual, Emotional and Social). Students will also begin to learn about the factors that can effect a person's development, including physical, social, cultural and economic factors. Curriculum link: Child development	Assessment period: Students will be writing their assignment during this time.	Students will learn about the different life events including; physical events such as accident, illness or injury, relationship changes and life circumstances. They will then learn how people deal and adapt in different ways to these changes and types of support they might use to do this.	Assessment period: Students will be writing their assignment during this time	Students will learn about the range of health and social care services (primary, secondary, tertiary), any barriers individuals face and how they may be overcome. Curriculum link: Child development	Assessment period: Students will be writing their assignment during this time	Students will learn that individuals accessing health and social care services are often vulnerable. For this reason a set of values exists. Students will learn how to adopt caring behaviours and practise demonstrating care values. Students will also learn how to review their own practise and improve it. Curriculum link: Child development	Within component A, students will learn how a range of factors such as diet and exercise, stress, financial resources and housing can effect health and wellbeing. To finish they will look at how life events relating to relationship changes and life circumstances have an effect on health and wellbeing.
